

SIDE DUMP BUCKET

Steel Unlimited, Inc.

Side Dump Buckets can be designed to dump to the customer's preferred dumping side.

Right or left side dump.

They are specifically designed for working in sand, gravel, loose dirt and rocks.

Ideal for working in tunnel construction, building levees, filling trenches and demolition of asphalt roadways.

Features:

- ★ Heavy duty frame design provides years of long life and service.
- ★ High dump angle for material discharge.
- ★ Available with optional bolt on edge
- ★ Loader requires third-function hydraulics to actuate cylinders - jumper hoses included with bucket
- ★ Available in both pin-on and coupler-equipped configurations
- ★ Sequence valve locks/unlocks the bucket cradle and side dump function for added safety and control during transportation and placement

Custom sizes available.
